

WHAT WE DO. AND HOW MUCH IT COSTS

The brightest talent. The best universities. The strongest support.

The world's leading authority
in academic and athletic scholarships since 2001.

WORLD LEADER IN STUDYING IN THE USA.

The world's getting smaller - It's never been easier to communicate or travel, and more and more businesses are operating in a global marketplace. It's no wonder so many students are choosing to expand their learning abroad. Over 4.6 million in fact, rising to an estimated 6 million by 2020.

US degrees offer fantastic opportunities in some of the world's best universities and colleges. It's a life-changing experience, but finding the perfect place to spend the next three or four years isn't always straightforward. The right course, the right culture, the cost, the admin...they all have to be considered.

FirstPoint USA take care of everything.

We will manage the entire process for you. Helping you select universities, write your application and arrange the practical details of living in a new country. Taking away the hassle that so often causes students to stay put.

We've been supporting students' overseas journeys for more than 18 years. And many of our team are ex-academic and sports students who have gone through the process themselves. So far, we've helped over 8,000 students – placing them in over 2,900 US universities and colleges. And we've helped many find funding through full and partial scholarships worth over \$200 million in total.
